Memorize the Arabic Alphabet

Practice worksheets

Name: _____ Date: _____

1. Shape families

Write the bowl family and curve family. State the dots that distinguish each member.

2. Cover and recall

Choose six known letters. Hide the labels, shuffle the order and name each letter.

3. Delayed review

Log the result today, tomorrow and later in the week. Record actual errors rather than only scores.

4. Transfer

Find one learned letter in a connected word and explain what stayed recognizable.

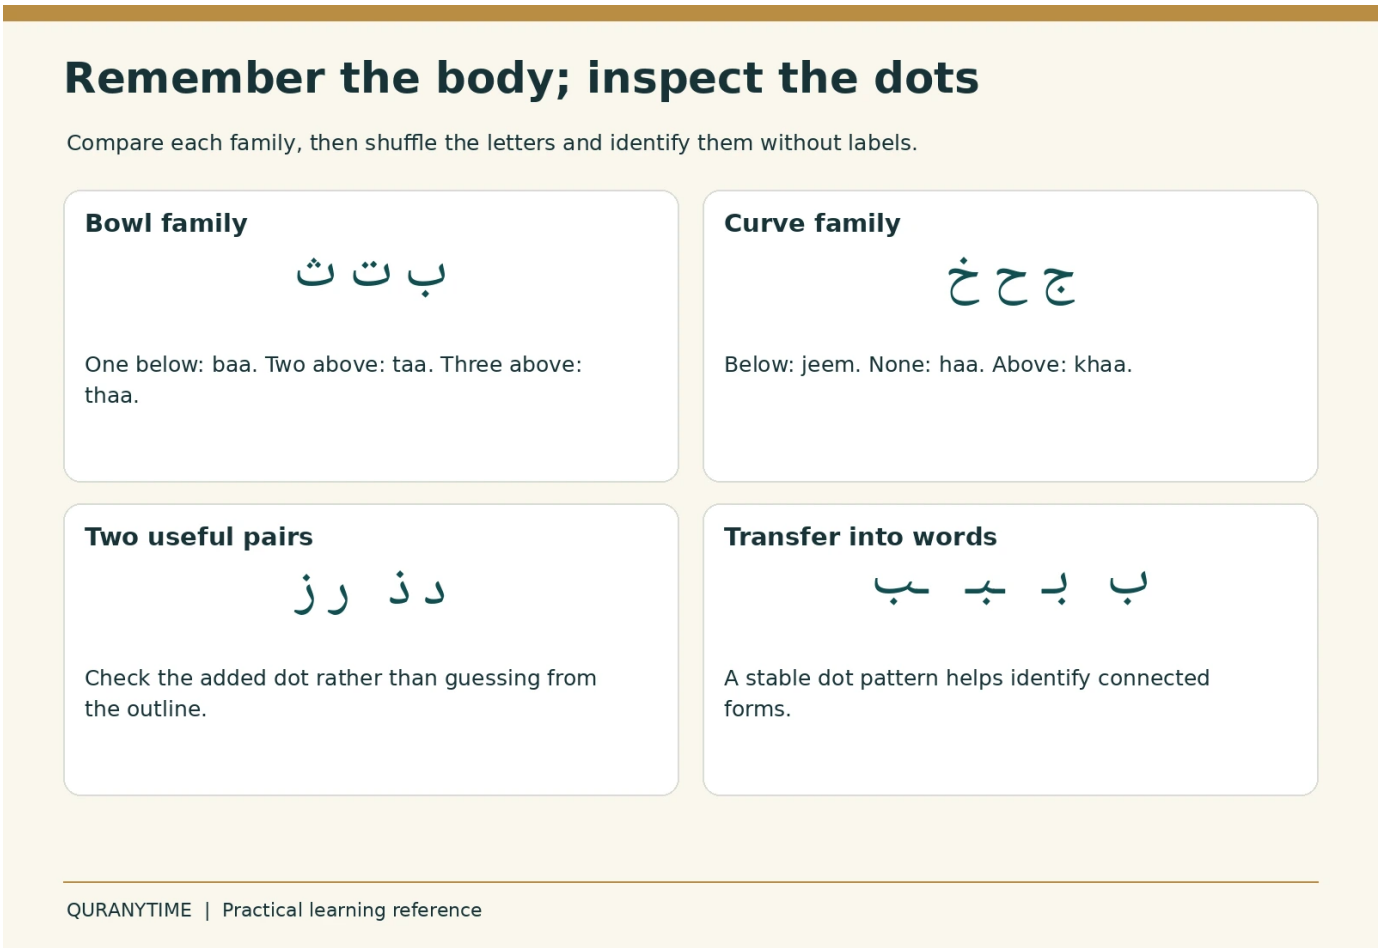
Memorize the Arabic Alphabet

Answer guidance and visual reference

Bowl family: baa, taa, thaa. Curve family: jeem, haa, khaa. Use the visual to check dots.

Review records vary. Correct errors after attempting recall, then revisit after a delay.

Connected forms preserve recognizable features while joining strokes adapt.



Use with the full article. Teacher feedback is recommended for pronunciation.

Apply it: reference and practice

How to Memorize the Arabic Alphabet

Recall grid: choose six letters. Record the attempt before opening the model.

Target letter	Today	Tomorrow	Later this week

Record body, dots, sound and connected form separately. Next practice date: _____

Target	Observed error	Next correction
