Free vs Paid Arabic Courses

Practice worksheets

Name: _____ Date: _____

1. Goal first

Write your target skill and Arabic variety, plus one task you want to perform independently.

2. Compare providers

For three options, record format, teaching minutes, feedback, total fees and missed-lesson policy.

3. Cost example

Calculate 30 minutes x 2 sessions weekly x 4 weeks at an illustrative $6/hour.

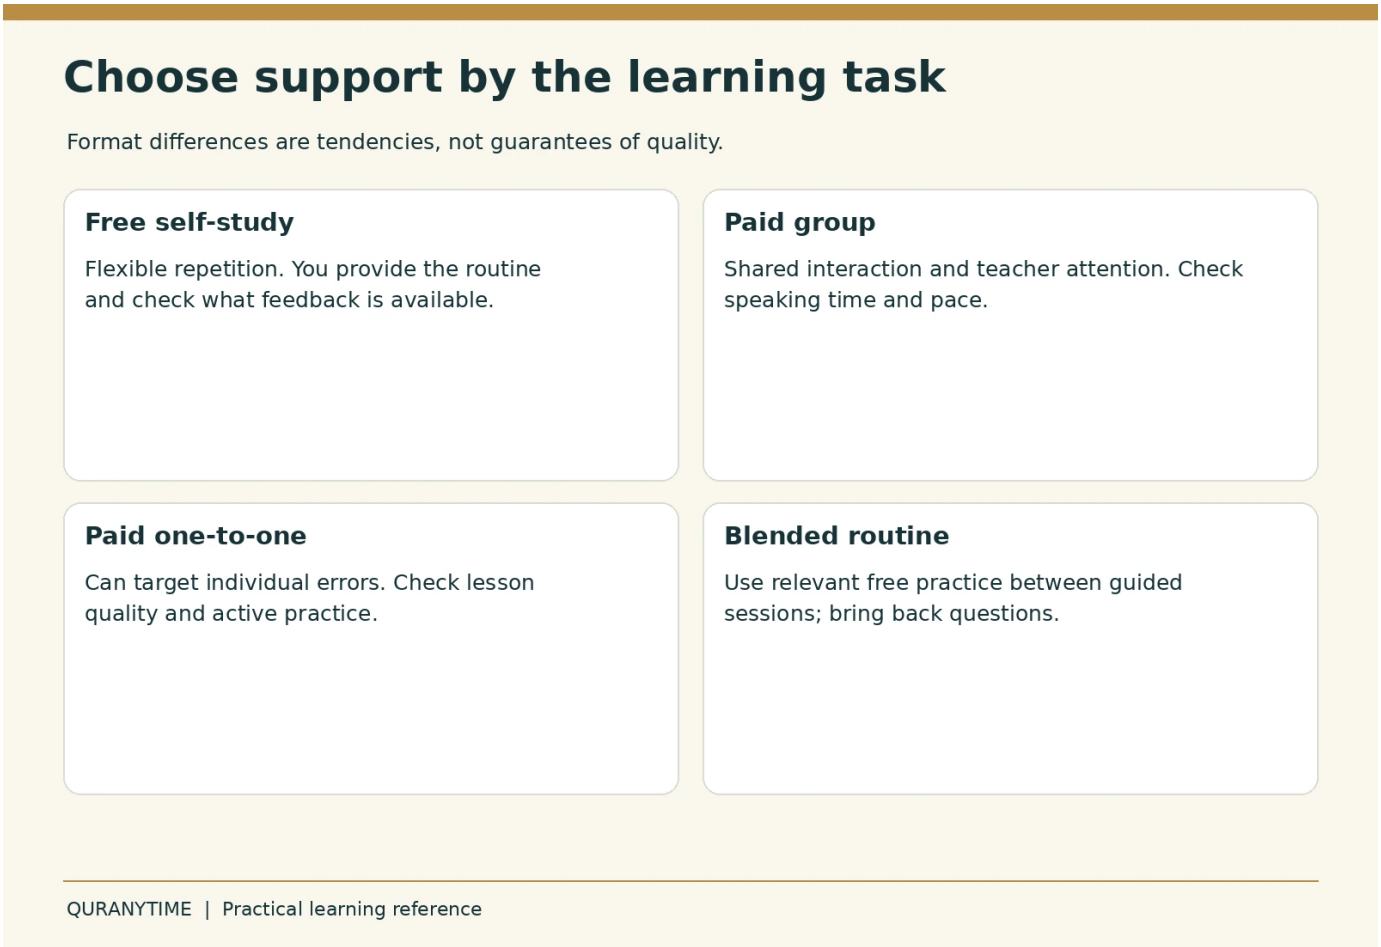

4. Trial reflection

Record one correction received, active reading or speaking time, and the proposed next step.

0.5 hours x 2 x 4 = 4 hours. At the illustrative rate: $24 before any applicable fees.

Provider comparisons and trial reflections are individual; leave missing answers marked unknown.

Choose by fit and feedback, not by price alone. A four-week package is not always a calendar month.

Use with the full article. Teacher feedback is recommended for pronunciation.

Apply it: reference and practice

Free vs Paid Online Arabic Courses

Course comparison: fill unknown answers as unknown. Set your priorities before scoring.

Criterion	Option A	Option B	Option C
Goal / Arabic variety			
Teaching minutes			
Individual feedback			
Monthly total + fees			
Missed-lesson policy			
Schedule / time zone			
Trial observation			

Monthly hours = (minutes / 60) x sessions per week x teaching weeks.

My calculation: _____ / 60 x _____ x _____ = _____ hours.

Tuition: _____ hours x _____ hourly rate + _____ fees = _____ total.

My three priorities: 1. _____ 2. _____ 3. _____
